

IRCAD: INNOVATION & EXCELLENCE FOR SURGERY

The IRCAD offers an exceptional training facility, welcoming over 7,200 surgeons from all surgical specialties every year. It is considered one of the leading surgical education providers in the world in the field of minimally invasive surgery. With the world's top experts, the perfect mix between theoretical sessions and hands-on practice, and the latest generation of robots, the IRCAD experience will answer all your needs.

FULL IMMERSION IN PEDIATRIC SURGERY

At the end of the 1980s, pioneers in pediatric videosurgery demonstrated that all kinds of malformations could be managed using laparoscopy, thoracoscopy, retroperitoneoscopy, subcutaneous videosurgery, videosurgery combined with endoluminal endoscopy, and robotic surgery.

During the same period, we had to convince colleagues and families that many benefits could be obtained for our patients and conclusions could be drawn with the iterative paradigm **"This new minimally invasive approach is safe and feasible"**. And very quickly, we could add the description of the advantages we could have with these techniques.

During an IRCAD course, participants have the opportunity to learn, share, ask questions, improve technical skills, meet experts and colleagues, and compare various experiences. **Pediatric urology and pediatric visceral surgery are distinct specialties.**

Consequently, for 16 years and every two years, we have had two different course offerings, alternating between visceral thoracic neonatal surgery and urological surgery. In 2022, there will be **two specific courses** dedicated to these specialties.
